Forecast for Tuesday 28 Nov 2023

Weather: Rather cloudy overnight and early morning with patchy rain and summit sleet and snow possible. The cloud gradually thinning and breaking during the morning to give bright or sunny spells by the afternoon. Thickening cloud later in the evening with a risk of sleet or snow showers arriving from the west into the overnight period.

Chance of cloud-free hill tops above 600m: 20% initially, rising to 90% in the afternoon. Lowering from the west to 40% later.

Low cloud and visibility: Occasional or extensive cloud at first with bases 400-600m, lowest towards the south of the park. Cloud clearing away by the afternoon with bases then above summits. Cloud lowering from the northwest more solidly into the evening to give bases of 500-800m, lower in any wintry precipitation. Visibility mostly very good outside of cloud, although poor or very poor in any wintry precipitation and in patches of mist or freezing fog.

03:00 on Tue 28 Nov 2023	3mm	8.4mm	8.6mm

Forecast for Wednesday 29 Nov 2023

Weather: Clear spells at first with isolated patches of freezing fog in valleys. Becoming cloudy through the morning with patchy light sleet and snow arriving from the north, but falling as rain lower down. The rain and snow clearing by the afternoon with some brighter spells developing. Variable cloud overnight with frosts forming readily where skies clear.

Maximum wind: East or Northeast 10mph

Chance of cloud-free hill tops 600m: 40% for a time early morning, becoming 80% by afternoon.

Low cloud and visibility: Extensive bases around 600m during the morning clearing to the south and lifting to be above most summits by the afternoon. Visibility very good or excellent, except in any early showers or freezing fog patches.

Temperature: **Valleys:** Zero Celsius rising to Plus 4 Celsius around the middle of the day.
At 600m: Zero Celsius falling to Minus 4 Celsius later
Freezing level: Around 600m then most levels by evening.
